

# Analytic Platform for Government

Multiple video analytics:  
one intelligent system

## 3VR's Analytic Platform gives Government:

**Access to multiple leading video analytics** — 3VR's award-winning API enables seamless integration with leading analytics from face recognition to motion and behavior analytics to OCR.

**Seamless data and camera integration**— 3VR's data API enables simple integration with external databases, systems, and watchlists.

**Software Development Kit**— 3VR's flexible API and SDK enable government users to develop analytic solutions tailored to specific needs.

**Cross-analytic searches and alerts**— Investigators can use a single search interface to search across multiple analytics, cutting down on investigation time and streamlining the collection of accurate, actionable evidence.

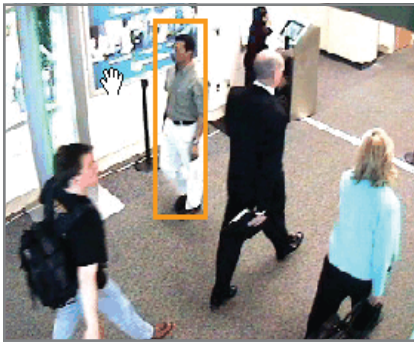

## Industry-leading Video Analysis and Alerts

- **Event Storyboard UI:** 3VR users can monitor or search for all event types through the same user interface.
- **SDK:** 3VR systems can be tailored to meet specific needs with a flexible API and robust SDK.
- **Advanced Behavior Recognition and Video Analytics**—3VR's Analytic API enables highly scalable, enterprise-wide solutions that marry sophisticated video analytics with elegant, centralized management and monitoring for airports, secure facilities and critical infrastructure

- Human Tailgating
- Exit Lane / Wrong Way
- Unattended Object
- Removed Object

- Perimeter Intrusions
- Loitering
- Stopped Vehicles
- Vehicle Tailgating

## Data and Camera Integration

- **Integrate analog, IP, Megapixel or virtual cameras:** 3VR's Camera API enables support for hybrid camera configurations and expansion beyond traditional limits 16 cameras without expensive and complicated codecs
- **3rd-party data integration:** 3VR's Data API enables seamless integration with external data sources, automatically synchronizing data feeds with video and images.
